Problem Solving and Programming - CS200

Section: CS200 001242S Main Campus **Section Type:** Lecture Credit Hours: 4.00 **Course Description:** An exploration of algorithm design principles and their application in procedural programming, focusing on state, control structures, functions, and modularity. Topics include patterns of conditional and iterative control structures, program testing techniques, and an introduction to data structures, classes, and objects. Students will engage in programming projects that emphasize problem analysis, solution design, and the development of well-structured programs. WHEN Days: T R Times: 11:30 AM - 02:00 PM Start Date: 01/14/2025 End Date: 05/08/2025 WHERE Campus: Main Campus **Building: Shears Technology Center** Room: STC130 **INSTRUCTOR** NABIL ABDULLAH BOOKS Title: JAVA: AN INTRODUCTION TO PROBLEM SOLVING 8TH Edition Author: SAVITCH Required: Yes
