Discrete Structures - CS203

Section: CS203 001192S Main Campus
Section Type: Lecture
Credit Hours: 3.00
Course Description: This course will cover the techniques used in problem solving and mathematical reasoning. Students will learn the framework for basic programming algorithms, and the roles discrete objects play in basic computations required in logical programming practices.
Course Notes: Students who do not have the required prerequisites must receive Departmental II consent before enrolling. Students should have computer programming knowledge before enrolling in this course.
