

# World Geography - GE101

---

**Section:** GE101 836232S Online

**Section Type:** Lecture

**Credit Hours:** 3.00

**Course Description:** World Geography takes students on a tour of the world. Learn the main concepts geographers use to understand physical and human geography, such as maps, population growth, migration, climate, culture, geopolitics, and economic development. Those concepts are then applied to each region of the world in turn. Gain an understanding of how regions are different from each other, as well as how globalization is drawing people closer together.
