Server Operating Systems and Virtualization - IS237

Section: IS237 816251S Online
Credit Hours: 3.00
Course Description: Comprehensive study of server operating systems and virtualization, with a primary focus on Windows Server, Linux Server, and virtual hypervisors. Students will define the installation, configuration, management, and troubleshooting of server environments within virtualized contexts. Emphasis will be on industry best practices, server deployment, resource allocation, and the use of virtualization technology to optimize performance and scalability across server platforms.
