

Games: Magic the Gathering - NC203

Section: NC203 002231S Main Campus

Section Type: Lecture

Credit Hours: 0.00

Course Description: Magic's gameplay and strategy are frequently described as a combination of poker and chess. Like poker, variance and hidden information are both central to the game, so some knowledge of statistics, bluffing, and concepts like "expected value" is key to success. And like chess, there are near-infinite ways any given game can play out. Thinking a few turns ahead, and having a plan for how to take down your opponent, are crucial skills.

Section Notes: Dive deeper into Magic's™s gameplay and strategy, explore methods of counter strategy and playing competitively. You will also learn how to build a custom deck and the things to avoid while doing so.

WHEN

Days: M

Times: 06:00 PM - 07:00 PM

Start Date: 10/09/2023

End Date: 10/30/2023
