

Foundations of Nursing Lab - NR110L

Section: NR110L003251S Main Campus

Section Type: Lab

Credit Hours: 1.00

Course Description: Knowledge and skills required to care of patients in a clinical setting. Demonstration, guided practice, and simulation used to reinforce critical thinking and application of foundational concepts such as asepsis, communication, safety and patient education. Concepts progress from basic nursing skills to advanced nursing skills.

Course Notes: This course is taken during the first semester of the Associate Degree Nursing program. Formal admission to the program is required for enrollment.
